

Mouse Anti-Human α -synuclein Monoclonal Antibody Datasheet

Product Name: mAb anti-Human α -synuclein

Clone No.: 4B4

Catalogue No.: MO-M40097C

Quantity: 0.5 mg/vial

Description: Mouse monoclonal antibody to human α -synuclein

Purification: Protein G affinity purified

Product type: Primary antibody

Target Protein: Human α -synuclein

Immunogen: Recombinant human α -synuclein (1-140 aa) expressed in E. coli.

Fusion Myeloma: Sp2/0-Ag14

Specificity: This antibody recognizes human α -synuclein epitope YQDYEP(E).

Species Reactivity: Human

Host / Isotype: Mouse, IgG2a, Kappa

Formulation: Lyophilized from a solution in 0.01M PBS, pH 7.2

Reconstitution: Double distilled water is recommended to adjust the final concentration to 1.00 mg/mL.

Storage: Store at -20°C

Research Area: Parkinson's disease, neurodegenerative diseases

Background: α -synuclein is a protein of unknown function. It is mainly found in neural tissue. There is a lipid-binding motif

similar to that of Apolipoproteins on its N-terminal. A hydrophobic region that is the non-beta component found in amyloid aggregation in Alzheimer's disease is located at the central region of the protein. The abnormal aggregation of α -synuclein on brain tissue is called Lewy bodies, which are found in Parkinson's disease, dementia and multiply system atrophy. Mutated α -synuclein gene is found to be associated with rare familial form of Parkinson's disease.

Applications: **Indirect ELISA:** The antibody reacts with human α -synuclein.

Western Blot: Detect recombinant α -synuclein (α -SYN) using antibody 4B4 at 5 μ g/mL dilution.

Western blot- α -synuclein(α - SYN)

1 2

1&2 α - synuclein (α -SYN) at 500ng/well
